

# Awesome Data Effectiveness

Brandon Bretl

Sami Dhaliwal

Nathan Kuhn

Brian Vancil

University of Kansas

## How to Participate

1. Think about your experiences with data projects.
2. On sticky notes, share your **successes** and **struggles** on the topics before you.
3. Save the QR Code or URL for later learning and conversation.

## Successes and Struggles

If you are joining us remotely, we asked participants to share successes and struggles in the following categories.

1. Purpose and planning
2. Storage and data quality
3. Communication and visualization
4. Reproducibility

## Conclusion

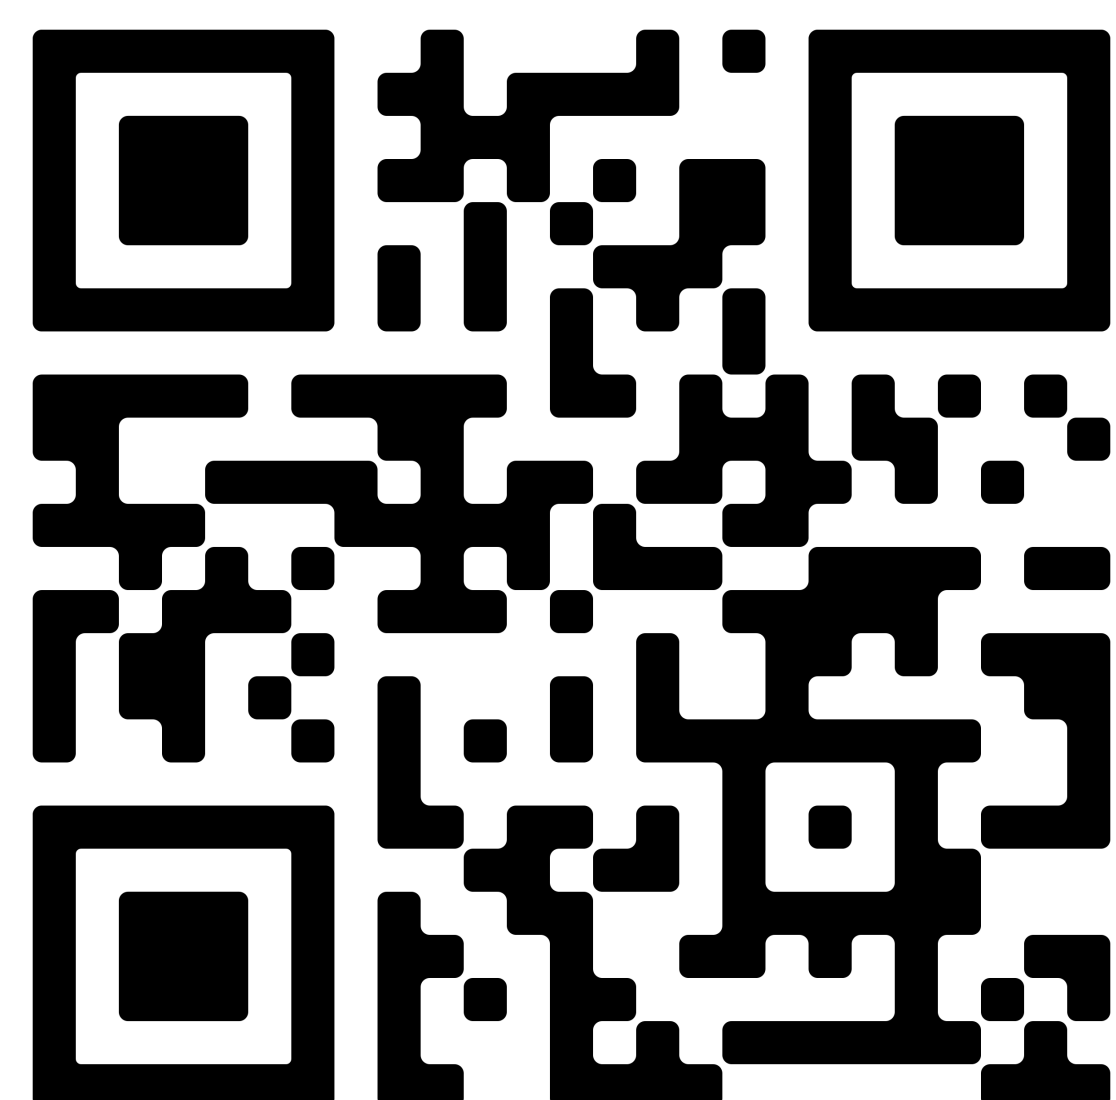

Our code is on GitHub at <https://github.com/bvancilku/awesome-data-effectiveness>. If you have an idea to add, please raise an issue or pull request. Thank you for visiting today!

# When working on data projects...

## 1. What helps you succeed?

## 2. What do you struggle with?

### Add your answer on a sticky note!
